

Haul and Set
Procedures and Requirements

The purpose of this service is to provide customers of Tohono O’odham Utility Authority (TOUA) a courtesy service to install a wood pole so that the customer’s metering equipment can be mounted to meet proper height requirements for point of attachment.

Pole Purchase:

Poles may be purchased through TOUA for the purpose of installing a meter box and main disconnect. It is the customer’s responsibility to assure that the purchased pole meet TOUA’s height requirements for the point of attachment.

Poles and Haul and Set costs must be paid prior to work being scheduled. All work will be at TOUA’s discretion and as TOUA’s work load permits.

Mark Pole Location:

Customer requesting a Haul and Set must place a stake marked with white paint at location of pole set. A drawing must be submitted with pole set location as well as buildings, driveways and leach field if they apply.

Utility Locates (Blue Stake):

The customer is responsible for requesting a Blue Stake by calling (520) 383-5770. All customer owned underground lines i.e. water, electric and telephone must be marked by the customer. A copy of utility locate sheets and any drawings of customer owned lines must be submitted.

TOUA assumes no liability for unmarked customer owned buried lines.
